I love to see how excited 1st Grade students get over working with money. This unit is loaded with hands-on and engaging math centers that help students build a strong foundation for counting coins, which will be more developed in the 2nd Grade math curriculum. This is a COMPLETE, comprehensive math curriculum for first grade. It includes 10 units with 9-11 lessons each to teach the concepts and standards first graders need to learn. This bundle is NOW COMPLETE and ready for an entire year of math instruction! Every unit is a jam-packed, mind-focused math ... This 100th Day of School writing on what they liked and didn't like so far about first grade stopped us in our tracks. We are in our second year of a new math adoption, and our class has made it pretty clear how they feel about math in our classroom this year.
